

MANNINGTON
C O M M E R C I A L

To Whom It May Concern:

Re: CRI Green Label for Adhesives
South Coast Air Quality Management District Rule 1168

This letter is to confirm that all Mannington adhesives comply with the VOC limits currently established by the "South Coast Air Quality Management District Rule 1168" and "CHPS 01350." These adhesives meet the requirements of USGBC LEED Indoor Environmental Quality credit 4.1 – Low Emitting Materials – Adhesives & Sealants. Keep in mind this is an "all or nothing" credit meaning each and every adhesive and sealant in the entire LEED project must pass SCAQMD Rule #1168.

Should you have any questions regarding our adhesive, please contact our Technical Service Department at 800-241-2262 Ext. 3

Sincerely,

Kelly Parker
Technical Services Coordinator
