tx:style II

The Mannington Commercial tx:style design challenge engages a community of more than 18,000 designers to become participants in our product development process. The designer of Blue Matrix, Athena Abrol, worked with Mannington Commercial to develop her winning pattern into a full collection.

Graphics in unexpected patterns and texture effects range from a high technology look and feel to a handcrafted stitch effect. The coordinating patterns in the tx:style II collection create a freedom in application that accommodates any project.
